A presentation from Greg Totten, Economist at the Colorado Demographer’s Office on the demographic composition and trends across Colorado.

11:30 – 1 PM

Lunch with Conference Sponsors

Sponsored by Colorado Springs Utilities

1 PM – 2:15 PM

Keynote Presentation: “Drone Innovations, How Drones Can Help Utility Operations”

A presentation and discussion with Scott Fredericksen, CEO and Chief Pilot at Colorado Aerial Imaging. The potential of remotely operated drones for transmission line inspection has long been discussed in public power circles, however, this application only scratches the surfaces of the ways in which drones can be used to monitor utility systems. From electric distribution fault identification and vegetation/wildfire management, natural gas distribution leak identification, water sampling and water tank inspection, to underground system 3D mapping through LiDAR, drone technology has the potential to drive gains in system and employee safety, labor costs, and operations across all facets of municipal utility operations.

2:15 – 2:45 PM

Refreshment Break with Conference Sponsors

2:45– 3:15 PM

State and Federal Funding for Municipal Utilities

A conversation with Julia Masters, Microgrids for Community Resilience Program Manager at DOLA’s Colorado Resiliency Office and John Parks, Electricity Markets Policy Analyst at the Colorado Energy Office, on state and federal funding opportunities for microgrids, grid hardening, and other distribution systems improvements.

3:15– 4:00 PM

A Conversation with the Colorado Energy Office

A conversation with Keith Hay, Senior Director of Policy, Colorado Energy Office, on the multiple efforts being undertaken at CEO on Colorado’s Greenhouse Gas Emissions Reduction Road Map, and how the CEO is looking to engage public power on these efforts.
